Staff Kitchen Access Risk Assessment & Rules

Separate departmental pack for:

Kitchen staff · Restaurant / FOH staff · Building & Ground staff

Anyone entering the kitchen, fridge, freezer, dry store or portable cabin

The Vedanta Kitchen & Retreat Centre

Assessor: Shyam Prasad

Date: 27 June 2026

Review due: 27 June 2027

This pack is SEPARATE from the equipment risk assessment brochure.

Issue a copy to each department whose staff enter the kitchen.

Contents

1. Who this pack is for
2. Mandatory PPE before entering the kitchen
3. Restaurant & Front of House — kitchen access steps
4. Moving safely around the kitchen
5. Clean as you go — leave the kitchen professional
6. Hot gastronorm trays, buffet & service collection
7. Fridge, freezer, dry store & portable cabin
8. Building / maintenance / other visiting staff
9. Kitchen staff reminders
10. Risk assessment table
11. Emergency & reporting
12. Department acknowledgement sign-off

1. Who this pack is for

Workplace	The Vedanta Kitchen & Retreat Centre — Branston Hall, LN4 1PD
Company	The Vedanta Way Limited
Assessor	Shyam Prasad
Assessment date	27 June 2026
Review date	27 June 2027, or sooner after an incident / near miss / layout change
People covered	Kitchen team; restaurant / FOH / service staff; housekeeping; maintenance; office / building / ground staff; contractors; any visitor entering food areas
Areas covered	Main kitchen, pass/service area, fridge, freezer, dry store, portable cabin, corridors linked to kitchen, buffet / hot-holding collection points

Anyone who is not working a full kitchen shift still creates risk when they enter the kitchen to collect food, check stock, clean, repair, or walk through. This pack sets one clear standard for all departments.

2. Mandatory PPE before entering the kitchen

 THE VEDANTA WAY LIMITED

Before You Enter The Kitchen

YOU MUST

1

**WEAR
ANTI-SLIP SHOES**

2

**WEAR HAIR NET
COVERING ALL HAIR**

3

**WEAR SHIRT &
APRON CLEAN**

4

**WASH HANDS AT SINK
WHEN ENTERING**

**WASH HANDS
REGULARLY**

DO NOT

OPEN SHOES

LOOSE HAIR

NO APRON

DIRTY HANDS

FOOD SAFETY IS EVERYONE'S RESPONSIBILITY | BE CLEAN. BE SAFE. BE RESPONSIBLE. | SAFE KITCHEN. SAFE YOU.

No person may enter the kitchen food area without the following:

1. Anti-slip / non-slip health & safety footwear — mandatory. No open sandals, flip-flops or smooth soles.
2. Hair net — all hair must be fully covered. Long hair secured under the net.
3. Shirt apron — clean shirt apron must be worn when entering / using the kitchen.
4. Wash hands when you enter the kitchen, and wash hands regularly while working with food, trays or storage.
5. Remove loose jewellery, dangling lanyards and scarves that can catch on equipment.
6. Wash or sanitise hands again before touching ready-to-eat food, clean trays or utensils.

Note: A chef's tissue / neck tissue is optional at this site. The required standard is anti-slip shoes + hair net + shirt apron + hand washing on entry and regularly.

Do / Don't / Care

DO

- Wear anti-slip shoes every time
- Cover hair fully with a hair net
- Wear a clean shirt apron
- Wash hands when entering the kitchen and regularly during use

DON'T

- Don't enter in open shoes or smooth soles
- Don't leave hair uncovered
- Don't enter without a shirt apron
- Don't touch food or trays with unwashed hands
- Don't wear outdoor coats over food-contact work

CARE

- Keep spare hair nets and clean shirt aprons near the kitchen entrance
- Replace damaged or dirty PPE immediately
- Managers enforce the PPE gate — no exceptions for “quick visits”
- No hair net / shirt apron / hand wash = no kitchen entry

3. Restaurant & Front of House — kitchen access steps

Restaurant & FOH Staff — Kitchen Access Steps

1 Put on anti-slip shoes hair net chef tissue 	2 Announce yourself / ask permission if busy 	3 Watch for wet or oily floor 	4 Keep clear of knives and chef walkways 
5 Stay away from open oven doors and fryers 	6 Check expiry cleanliness when using fridge freezer dry store 	7 Use heat-proof cloths for hot gastronorm trays 	8 Leave area tidy report hazards 

WORK TOGETHER • STAY SAFE • RESPECT THE KITCHEN

Restaurant and FOH staff often enter to collect plated food, buffet gastronorm trays, drinks support items, or stock. Follow these steps every time:

1. Put on anti-slip shoes, hair net and shirt apron, then wash hands before entering.
2. Pause at the door — look and listen. If the line is busy, wait or ask the chef before crossing.
3. Watch the floor for water, oil, food spill or wet-floor signs.
4. Keep clear of chefs' knife work and prep boards; never reach across a cutting board.
5. Stay away from open oven doors, hot ranges and fryers — steam and oil splash burn quickly.
6. Use only agreed routes to the pass, fridge, freezer, dry store or cabin.
7. When collecting hot trays / buffet items, use dry heat-proof cloths (see next section).
8. If you used any equipment, board or knife — clean as you go and put everything back (see Clean as you go section).
9. Leave promptly, keep walkways clear, and report any spill, out-of-date food or unsafe practice.

4. Moving safely around the kitchen

Kitchen hazards for anyone walking through:

- Wet, greasy or oily floors — high slip risk near sinks, dishwasher, fryers and pass.
- Chefs carrying knives, hot pans or trays — call “behind”, “hot”, “sharp” and give way.
- Ovens on — doors may open suddenly with steam and radiant heat.
- Fryers in use — oil splash, hot zone around the fryer, never rush past.
- Trailing cables, trolleys, crates and bin bags in corridors.
- Fridge / freezer doors swinging into walkways.
- Noise and distraction — do not use phones while moving through the cook line.

Do / Don't / Care

DO

- Walk, don't run
- Keep left / use agreed routes
- Call out when passing (“behind”, “hot”)
- Wipe or report spills immediately

DON'T

- Don't cut through the hot cook line unless required
- Don't stop to chat in doorways or at the pass
- Don't carry more than you can see over
- Don't ignore wet-floor signs

CARE

- Expect the unexpected — ovens, fryers and knives move fast
- If unsure, wait for a kitchen team member to guide you
- Near-misses must be reported the same day

5. Clean as you go — leave the kitchen professional

If restaurant staff, house staff, FOH, kitchen team or anyone else uses the kitchen — even for a short task — they must clean as they go. The kitchen must be left professional, tidy and ready for the next person. Do not leave chopping boards, knives, peelers, pans, utensils or equipment behind dirty or out of place.

Clean-as-you-go steps (everyone):

1. Finish your food task first, then clean immediately — do not walk away “for later”.
2. Wash or sanitise knives, peelers and utensils you used; dry them.
3. Wash chopping boards (correct colour board for the food type) and stand them to dry or return clean.
4. Wipe the worktop, sink edge and any spills on the floor you caused.
5. Return knives and peelers to the designated drawer; return other equipment to its correct place.
6. Never leave a dirty board, knife, blender shaft, pan or tray on the side for someone else to clear.
7. If you used a fridge, freezer, dry store or cabin — close doors, wipe drips, put stock back neatly.
8. Check the area looks professional before you leave. If you are unsure how to clean a piece of equipment, ask the chef — do not abandon it dirty.

Do / Don't / Care

DO

- Clean boards, knives and tools straight after use
- Put everything back in the correct place / drawer
- Wipe worktops and floor spills you made
- Leave the kitchen tidy for the next person

DON'T

- Don't leave chopping boards or knives on the side
- Don't leave dirty equipment for kitchen staff to clear
- Don't walk away mid-task without cleaning
- Don't put wet knives loose and jumbled in the drawer

CARE

- Clean as you go is mandatory for every department using the kitchen
- A professional kitchen stays ready for service at all times
- Managers may stop kitchen access for staff who repeatedly leave mess behind

6. Hot gastronorm trays, buffet & service collection

Hot Gastronorm Trays

& Buffet Service — Safe Handling

✓ DO

Use dry, heat-proof cloths and both hands.

Announce “Hot tray!”

Walk carefully.

✗ DON'T

Use **bare hands** on hot GN trays.

Stack trays **unstable**.

Carry **too many**.

Rush on **wet floor**.

♥ CARE

Check **tray lids**.

Wipe **spills**.

Set trays on **stable surface**.

Ask for help with **heavy, hot loads**.

HOT TRAYS CAN CAUSE BURNS AND SPILLS.

THINK SAFETY. PROTECT YOURSELF AND OTHERS.

SAFE HANDLING. GREAT SERVICE.

Restaurant staff collecting food for buffet / service often handle hot gastronorm (GN) trays. Bare hands on hot trays cause burns; rushing with hot trays on wet floors causes slips and scalds.

1. Confirm the tray is ready with the kitchen / pass before lifting.
2. Use dry heat-proof cloths or oven gloves — never wet cloths (steam burns) and never bare hands.
3. Check lids are secure; beware of hot condensate under lids.
4. Lift with two hands; keep the tray level; do not stack unstable hot loads.
5. Announce “hot coming through” on the route to the buffet / service point.
6. Walk carefully — if the floor is wet or oily, ask for the route to be cleared or dried first.
7. Set trays onto a stable stand / Bain-marie / buffet well — not on an unstable edge.
8. If a tray is too heavy or too hot, stop and ask for help. Do not struggle alone.

Hazard	Who is at risk	Risk before	Control measures	Risk after
Burns from hot GN trays / lids	Restaurant / FOH / kitchen staff	High	Mandatory dry heat-proof cloths or gloves; two-hand lift; announce hot; training before unsupervised collection.	Low
Slip/trip while carrying hot food	Restaurant / FOH staff; nearby guests/staff	High	Anti-slip shoes; clear route; no rushing; wipe spills; don't carry	Low

			overloaded stacks.	
Scald from hot liquids spilling from tray	Carrier and people nearby	High	Level carry; secure lids; don't overfill; keep guests clear of route.	Low

7. Fridge, freezer, dry store & portable cabin

Staff entering cold storage, dry store or the portable cabin must protect food safety as well as personal safety.

1. Wear required PPE before entry (anti-slip shoes, hair net, shirt apron) and wash hands.
2. Open doors carefully — watch for people on the other side and icy / wet floors.
3. Do not leave fridge or freezer doors open longer than needed.
4. Check use-by / best-before dates before taking or returning products.
5. Do not use out-of-date, damaged, unlabelled or unclean packaging — report it.
6. Keep raw and ready-to-eat foods separate; never place raw above ready-to-eat.
7. Maintain cleanliness: wipe drips, report dirty shelves, pests, bad smells or broken seals.
8. In the portable cabin: secure the door, keep stock tidy, switch lights off if required, report damage.
9. Wash / sanitise hands after handling outer packaging before touching ready-to-eat food.

Do / Don't / Care

DO

- Check expiry dates every time
- Close fridge/freezer doors promptly
- Keep storage clean and organised

- Report damaged / out-of-date stock

DON'T

- Don't leave doors propped open
- Don't store personal food with kitchen stock
- Don't ignore spills or unclean shelves
- Don't use unlabelled containers

CARE

- Cold chain and allergen control protect guests
- If in doubt, ask the chef / kitchen manager before using stock
- Cabin and dry store are still food areas — same hygiene rules apply

8. Building / maintenance / other visiting staff

BUILDING & SUPPORT STAFF — KITCHEN VISIT RULES

Thank you for helping us keep our kitchen safe,
clean and running smoothly.

DO

SIGN IN OR TELL CHEF
Let the chef or kitchen lead
know you are here.

**WEAR ANTI-SLIP SHOES
AND HAIR NET**
Required for safety and hygiene.

**STAY IN THE
AGREED AREA**
Work only in the areas
you are shown.

CLEAN AS YOU GO
Keep your work area and
shared spaces clean and tidy.

QUESTIONS? ASK.
SAFETY • RESPECT • TEAMWORK

DON'T

**TOUCH
FOOD PREP**

**OPEN OVENS
OR FRYERS**

**WALK THROUGH
ACTIVE COOKING LINE
WITHOUT ESCORT**

**LEAVE TOOLS
ON FOOD SURFACES**

**THANK YOU FOR HELPING
KEEP OUR KITCHEN SAFE.**

Housekeeping, maintenance, contractors and other building staff may enter for repairs, deliveries, cleaning or inspections. Extra controls apply because they may be unfamiliar with kitchen flow.

1. Report to the kitchen manager / chef in charge before starting work.
2. Wear anti-slip shoes, hair net and shirt apron; wash hands on entry (plus any extra PPE for the task).
3. Stay only in the agreed work area; do not walk the cook line unless escorted.
4. Do not touch food, prep surfaces, ovens, fryers or knives unless authorised and trained.
5. Protect food from dust, tools and chemicals — cover or remove food first if needed.
6. Clean as you go; remove tools and waste before leaving — never leave boards, knives or equipment dirty.
7. If cooking is live, wait for a safe window — never distract a chef mid-task at hot equipment.

9. Kitchen staff reminders

Kitchen team members remain responsible for warning visitors and keeping routes as safe as practical during service.

- Call “hot”, “behind”, “sharp”, “oven opening”, “fryer” clearly.
- Do not leave knives on the edge of boards or pointing into walkways.
- Close oven doors when not actively loading/unloading.
- Mop oil/water promptly and use wet-floor signs.
- Help FOH lift awkward hot GN trays when asked.
- Challenge anyone entering without anti-slip shoes, hair net, shirt apron or without washing hands.
- Keep fridge/freezer/dry store/cabin organised so visiting staff can find items safely.
- Remind restaurant / house staff: clean as you go — do not leave boards, knives or equipment behind.
- Do not accept a hand-over of dirty prep areas from visiting departments — ask them to finish cleaning first.

10. Risk assessment table — staff kitchen access

Hazard	Who is at risk	Risk before	Control measures	Risk after
Entering kitchen without anti-slip shoes	All visiting / kitchen staff	High	Mandatory anti-slip footwear policy; refuse entry if not worn; spare pairs available if site policy allows.	Low
Hair / clothing contamination of food	Guests / food handlers	High	Hair net mandatory; clean shirt apron; remove loose jewellery; wash hands on entry and regularly.	Low
Slips on wet / oily floors	All staff in kitchen	High	Anti-slip shoes; clean-as-you-go; wet-floor signs; no running; report spills.	Low
Contact with knives / being cut while passing	FOH / visitors / kitchen	High	Keep clear of prep; chefs announce sharp; knives stored safely after use; no reaching across boards.	Low
Burns / scalds from ovens, steam, fryers	Anyone near cook line	High	Stand clear of oven doors and fryers; chefs announce opening; visitors use agreed routes only.	Low
Burns from hot buffet / GN trays	Restaurant / FOH staff	High	Heat-proof cloths/gloves required; two-hand method; training; ask for help with heavy/hot loads.	Low
Collision with chef carrying hot items	All staff	Medium	Call-outs; keep-left; no stopping in pass; limit congestion during service.	Low
Using out-of-date / unclean stock from fridge/freezer/store/cab in	Guests (food safety) / staff	High	Check dates every time; report unclean or damaged stock; FIFO; manager checks.	Low
Cold-store door / icy floor injury	Anyone entering cold rooms	Medium	Anti-slip shoes; open carefully; keep floors dry; do not rush; close doors properly.	Low
Untrained building staff distracting cooks / touching equipment	Kitchen team / visitors	High	Report in first; escort if needed; agreed work window; no unauthorised equipment use.	Low
Leaving dirty boards, knives or equipment	All staff using kitchen; next users; guests	High	Mandatory clean as you go; wash and return	Low

behind after use	(hygiene)		tools; wipe surfaces; managers enforce professional leave- behind standard.	
------------------	-----------	--	--	--

11. Emergency & reporting

- Burns/scalds: cool under lukewarm running water for at least 20 minutes; seek first aid; call 999 for serious burns.
- Cuts: apply pressure with a clean dressing; seek first aid; do not continue food handling with an uncovered wound.
- Slips/falls: do not move a seriously injured person; call first aid / 999 as needed; secure the area.
- Food safety concern (out-of-date, contamination, allergen doubt): stop use, isolate product, tell the kitchen manager immediately.
- All accidents and near misses must be recorded the same day.

12. Department acknowledgement sign-off

I confirm I have read and understood this Staff Kitchen Access Risk Assessment, including mandatory anti-slip shoes, hair net, shirt apron, hand washing on entry and regularly, safe movement, hot tray handling, fridge/freezer/dry store/cabin rules, and clean as you go (never leave boards, knives or equipment dirty). I will follow these controls whenever I enter or use the kitchen.

Department copies to issue
